

Relationship and Sex Education at Western Road School

In Term Six every class will be undertaking some form of RSE education in their class, appropriate for their age.

Here is a guide to help answer any questions you may have.

- What is Relationship and Sex Education?
- What are schools expected to do?
- What will my child be taught?
- What language will be used?
- How will I be consulted?
- What can I do if I have concerns?

RSE is an important aspect of every child's personal and social development. It aims to help young people make informed, responsible and healthy choices about their lives, their relationships and their contribution to society.

To do this, children and young people need to:

- Gain information, knowledge, and understanding.
- Develop and use the **thinking** and **skills** that will allow them to become confident in making decisions and choices for themselves
- Consider their own and other's feelings, emotions and values.
- Learn about their rights and responsibilities.

RSE begins at home where children first become aware of their growing bodies and how they are kept safe and cared for. As they grow up children begin to explore and understand their feelings and values and how they relate to the wider world around them.

From an early age, young people are exposed to many conflicting ideas about health, lifestyle and sexuality from sources such as television, magazines, the internet and friends. Parents and schools share the responsibility for helping young people to make sense of these pressures and messages.

What are schools expected to do?

All schools are expected to provide RSE in line with Local Authority and National guidance. RSE is also informed by guidance for the teaching of Science, since the biological aspects of RSE are part of the <u>statutory</u> Science program of study, for primary age children (of which will be outlined on the following page)

We aim to also:

- Make sure that RSE takes account of each child's age, understanding and stage of development.
- Work in partnership with parents.
- Have procedures in place for parents to raise concerns.
- Have a method of consulting with pupils.
- Respect different cultural, ethnic and religious environment of the home.
- Respect the different home circumstances and needs of all young people.

RSE builds on what children already know. It is an important part of health education, education for personal and social development, and religious and moral education. It is also an important part of the science curriculum. Timing is also essential as in order to reduce fears and potential anxieties it is vital that children receive appropriate information before a key point of development e.g. it is pointless introducing menstruation after a girl has started her 'period'.

The content of the new National Curriculum for Science, for each Key Stage, related to RSE is outlined below. This is a <u>statutory</u> part of the school curriculum and children cannot be withdrawn from these aspects.

Foundation Stage, (Reception Year)

Investigate objects and materials by using all of their senses as appropriate.

Identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense.

Year 2

Notice that animals, including humans, have offspring, which grow into adults. Find out about and describe the basic needs of animals, including humans, for survival (water, food and air).

Describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene.

<u>Year 3</u>

Identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they get nutrition from what they eat.

Identify that humans and some other animals have skeletons and muscles for support, protection and movement.

Year 4

Describe the simple functions of the basic parts of the digestive system in humans. Construct and interpret a variety of food chains, identifying producers, predators and prey.

Year 5

Describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird.

Describe the life process of reproduction in some plants and animals.

Describe the changes as humans develop to old age.

Year 6

Recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function

The current program for RSE to be taught in this academic year is outlined below for each Year Group.

Foundation Stage, Myself and others Family networks Body awareness Hygiene	Year 1 Body parts Growing and Changing Keeping clean Keeping safe Families and care Respect	Year 2 Differences: boys and girls/male and female Naming body parts Growing and Changing Looking after the body Keeping safe Families and care Respect and Behaviour
Year 3 Challenging gender stereotypes Differences: male and female Family differences Personal space	Year 4 Growing and changing Body changes and reproduction What is puberty? Changing relationships	Year 5 Talking about puberty Becoming men and women Male and female changes Puberty and hygiene Building good relationships

Year 6
Puberty and reproduction, relationships and reproduction, conception and pregnancy, being a parent, sexting, HIV transmission.

What language will my child be taught?

It is vital that parents and carers are aware of the language being used in the Science and RSE teaching, so these can also be used at home to reinforce the appropriate names for parts of the body, changes etc. It is important that children are introduced to this language so that they know the accurate ways to refer to parts of their body. Below is the list of vocabulary specific to your child's year group.

Reception	Key Stage 1 (Years 1 and 2)		
happy baby pleased child calm skills Sad responsibility grumpy change cross discover run size jump shape hop hands swim head growing up hair body penis teeth Vagina Familiar terms for private parts e.g. 'willie' 'fanny' will be acknowledged	Male Female Girl Boy Man Woman Baby Child Teenager Adult Birth Death	Same Similar Different Unique Special Stomach Chest Penis Testicles Vagina Bottom	
Key Stage 2 (Years 3 and 4)	Key Stage 2 (Years 5 and 6)		
Hygiene Anus Toiletries Womb Bacteria Uterus Germs Scrotum Infection Testes Breast Love Nipple Responsibility Vagina Dependent Penis Testicles	Puberty Development Body odour Deodorant Periods Menstruation Sanitary towel Tampon Cervix Fallopian tube Clitoris Ovary Ovulation Sperm duct Urethra Breasts Hips	Pubic hair Voice breaking Love Commitment Marriage Arousal Erection Sexual intercourse Sex Fertilisation Ejaculate Conception Pregnancy Vagina Penis Testicles Sexual organs	

How will I be consulted?

The school has a responsibility to consult with you about our RSE programme. Some examples of how we might do this include:

- Information sent home (including this leaflet)
- Appointment with your child's class teacher to ask any questions
- Routine parent surveys and questionnaires.
- Opportunities to discuss SRE at the school parent forum

If you would like to view the materials (DVD and resource booklet specific to RSE teaching) we will be showing all programmes on Thursday 22nd June at 3.40pm. The DVD is used in Years 3, 4, 5, 6 but programmes will be appropriate for the curriculum.

What do I do if I have concerns?

If you have a particular concern about the school's RSE programme, the first thing to do is discuss it with your child's class teacher. Most parents are happy to let their children take part in RSE provided by the school. However, in some exceptional circumstances there are occasions when a parent/carer takes the view that this is an aspect of their child's education that they prefer to deal with at home. This is their choice. However parents/carers and the school should also take into account the child's views, given the child's statutory right to education. It must also be considered that it may be detrimental to their developmental understanding as they may receive distorted information, for example, from older siblings or in the playground from children.

If you have any further questions or concerns about this information please do not hesitate to contact me.

Mrs Kerry Bedford (PSHE Subject Leader) June 2017
