

## Art

Line drawings with block colours. See how much detail you can include.

In the style of a print artist, choose an endangered animal to sketch.

Using the style of Andy Warhol, draw the animal and colour it with block colours.

After this, you could sketch it in as much details as you like.

If you have paint and string at home, you can also stick the string to some cardboard in the shape of your animal, cover it in paint and then print your animal onto paper. You'll then be able to use pencil to add extra detail.
