WALT – understand the effects coronavirus has had to others

Discuss the next slides with an adult

It is important that we talk about things that are happening in the world
so that we can understand them better.

This was Lewes high street before lockdown

What do you think it looks like now?

This is a view now during lockdown

What has changed? (no people wandering, no people working)

This is a school before lockdown

What do you think will be different now?

This is schools now

Only a few children are going in to school and others are learning at home.

Supermarkets before lockdown

Supermarkets are less busy.
Some items are going quickly.

Going out of the house lots of people are wearing masks to protect themselves and others.

Everybody is washing their hands more!

Some hospitals are a bit busier than usual.

Less people are using their cars and going in aeroplanes so there is less pollution.

Can you think of any other differences?

Can you draw a picture or write a sentence about one of the changes lock down has made?
