

Please work your way through these, skipping to the next sheet if you do not feel challenged enough. 3 is the most challenging.

1)

1) Match the answer to complete the sentence:

A straight line is made up of _____
right angles.

A right angle is _____ degrees.

A straight line is _____ degrees.

180

90

2

2) Calculate the missing angles.

2)

- 1) Jen says, "If I turn from 2 o'clock to 8 o'clock, this is a half turn – 180° ".

Is Jen correct? Prove it!

What other turns can you identify on a clock face that would be the same value of 180° ?

- 2) Floria is describing angles on a straight line for her friend to draw. She says one of the angles is 32° , another is a right angle and the final angle is 68° . Is Floria correct? Prove it!

3)

Calculate the missing angles on this picture and explain how you worked them out.

$a = \underline{\hspace{2cm}}^\circ$.

I know this because ...

$b = \underline{\hspace{2cm}}^\circ$.

I know this because ...

$c = \underline{\hspace{2cm}}^\circ$.

I know this because ...

$d = \underline{\hspace{2cm}}^\circ$.

I know this because ...

- 1) Create your own straight-line angle problem picture like the one above.
Don't forget to label some of the angles and work out the answers yourself!
