

## Answer Sheet

Remember, (M) is written next to those questions you should have tried to solve mentally first. (W) means a written method is usually more efficient for this question.

1.  $\frac{2}{3}$  of 99 = **66** (M)
2.  $700 + \mathbf{600} = 1,300$  (M)
3.  $7,543 - 5,636 = \mathbf{1,907}$  (W)
4.  $765 \times 10 = \mathbf{7,650}$  (M)
5.  $873 \times 8 = \mathbf{6,984}$  (W)
