## Reasoning and Problem Solving Step 1: Describe Position

## National Curriculum Objectives:

Mathematics Year 4: (4P3a) Describe positions on a 2-D grid as coordinates in the first quadrant.

## Differentiation:

Questions 1, 4 and 7 (Reasoning)
Developing Identify the coordinate being described from given clues. Using up to 4 points, all points plotted on a $5 \times 5$ grid in the first quadrant. Explain your reasoning.
Expected Identify the coordinate being described from given clues. Using up to 6 points, all points plotted on a $10 \times 10$ grid in the first quadrant, using 1:1 scale. Explain your reasoning.
Greater Depth Identify the coordinate being described from given clues. Using up to 6 points, all points plotted on a $10 \times 10$ grid in the first quadrant, using varying scales with some points plotted between increments. Explain your reasoning.

Questions 2, 5 and 8 (Problem Solving)
Developing Correct mistakes made in writing coordinates in the first quadrant. Using up to 4 points, all points plotted on a $5 \times 5$ grid, using $1: 1$ scale.
Expected Correct mistakes made in writing coordinates in the first quadrant. Using up to 6 points, all points plotted on a $10 \times 10$ grid, using 1:1 scale.
Greater Depth Correct mistakes made in writing coordinates in the first quadrant. Using up to 6 points, all points plotted on a $10 \times 10$ grid, using varying scales with some points plotted between increments.

Questions 3, 6 and 9 (Problem Solving)
Developing Use given coordinates to work out the missing coordinates in the first quadrant. Using up to 4 points, all points plotted on a $5 \times 5$ grid.
Expected Use given coordinates to work out the missing coordinates in the first quadrant. Using up to 6 points, all points plotted on a $10 \times 10$ grid, using 1:1 scale.
Greater Depth Use given coordinates to work out the missing coordinates in the first quadrant. Using up to 6 points, all points plotted on a $10 \times 10$ grid, using varying scales with some points plotted between increments.

## More Year 4 Position and Direction resources.

## Did you like this resource? Don't forget to review it on our website.

1a. I'm thinking of a coordinate. The value of $x$ is between 2 and 5 and the value of $y$ is between 1 and 3 . Which coordinate could it be? Explain your answer.

1b. I'm thinking of a coordinate. The value of $x$ is between 2 and 4 and the value of $y$ is between 3 and 5 . Which coordinate could it be? Explain your answer.

2a. Caleb has written the coordinates for the points on the grid. Correct any mistakes he has made.

$$
A=(1,3) \quad B=(4,1) \quad C=(5,3)
$$

3a. $A=(1,1) \quad C=(3,4)$
Use this information to work out the coordinates of points B and D.

2b. Cara has written the coordinates for the points on the grid. Correct any mistakes she has made.

$A=(4,0) \quad B=(3,2) \quad C=(5,3)$

3b. $B=(1,3) \quad D=(5,1)$
Use this information to work out the coordinates of points A and C.

4a. I'm thinking of a coordinate. The value of $x$ is between 3 and 6 and the value of $y$ is between 7 and 9 . Which coordinate could it be? Explain your answer.

5a. Brandon has written the coordinates for a rectangle. Correct any mistakes he has made.

6a. $A=(2,3) \quad C=(7,7)$
Use this information to work out the coordinates of points B and D.

4b. I'm thinking of a coordinate. The value of $x$ is between 2 and 4 and the value of $y$ is between 3 and 6 . Which coordinate could it be? Explain your answer.

5b. Susie has written the coordinates for a pentagon. Correct any mistakes she has made.

6b. $A=(3,1)$
Use this information to work out the coordinates of points B and C.

7a. I'm thinking of a coordinate. The value of $x$ is between 3 and 6 and the value of $y$ is between 1 and 6 . Which coordinate could it be? Explain your answer.

8a. Sally has written the coordinates for a hexagon. Correct any mistakes she has made.

9a. $B=(45,45) \quad D=(5,5)$ Use this information to work out the coordinates of points A and C.

7b. I'm thinking of a coordinate. The value of $x$ is between 0 and 5 and the value of $y$ is between 4 and 7 . Which coordinate could it be? Explain your answer.

8b. Hashim has written the coordinates for a pentagon. Correct any mistakes he has made.

9b. $F=(15,40) \quad C=(45,20)$
Use this information to work out the points of the remaining coordinates.

## Reasoning and Problem Solving

 Describe Position
## Reasoning and Problem Solving

 Describe Position
## Developing

1b. B is the only coordinate that has a value of $x$ between 2 and 4, and a value of $y$ between 3 and 5 .
2b. Cara has read the $y$ axis before the $x$ axis on coordinate $A$, which should be $(0,4)$.
3b. $A=(1,1)$ and $C=(5,3)$

## Expected

4b. $D$ is the only coordinate that has a value of $x$ between 2 and 4 and a value of $y$ between 3 and 6.
5b. Susie has read the $y$ axis before the $x$ axis on coordinates A and D, which should be $(2,3)$ and $(9,5)$. She has misread coordinate E , as this should be $(7,3)$.
6b. $B=(5,9)$ and $C=(7,1)$

## Greater Depth

7b. A and D are the only coordinates that have a value of $x$ between 0 and 5 , and a value of $y$ between 4 and 7 .
8b. Hashim has read the $y$ axis before the $x$ axis on coordinates $C$ and $E$, which should be $(12,16)$ and $(13,6)$. He has misread coordinates A and D, which should be $(5,11)$ and $(18,13)$.
9 b . Grid increases in intervals of 5.
$A=(35,45), B=(35,30), D=(20,5)$ and $E=(10,20)$
