

Halves and Quarters

Investigate It

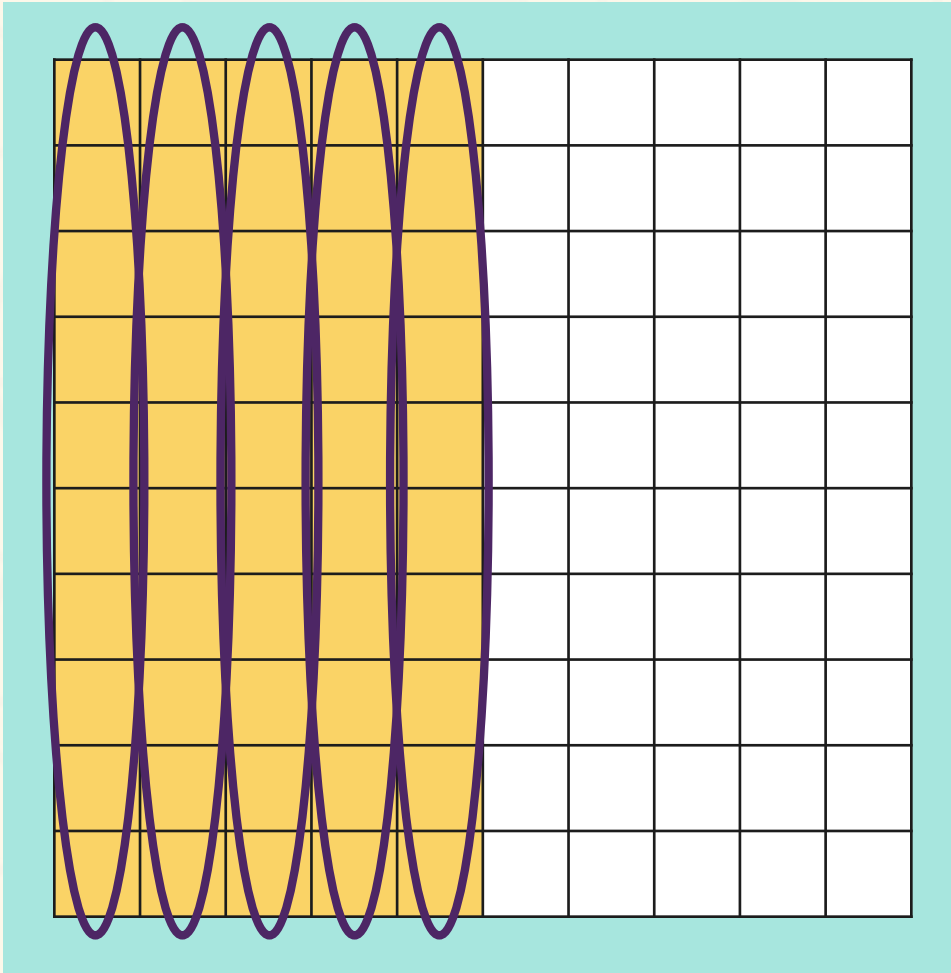

$$\frac{1}{2} =$$

$$\frac{1}{4} =$$

$$\frac{3}{4} =$$

Investigate It

$$\frac{1}{2} =$$

How many hundredths are coloured in?

How many tenths are coloured in?

In decimals, what is $\frac{5}{10}$?

$\frac{1}{2}$ is equivalent to $\frac{5}{10}$ so is written as 0.5 as a decimal.

Investigate It

$$\frac{1}{4} =$$

How many hundredths are coloured in?

In decimals, what is $\frac{25}{100}$?

$\frac{1}{4}$ is equivalent to $\frac{25}{100}$ so is written as 0.25 as a decimal.

Investigate It

$$\frac{3}{4} =$$

How many hundredths are coloured in?

In decimals, what is $\frac{75}{100}$?

$\frac{3}{4}$ is equivalent to $\frac{75}{100}$ so is written as 0.75 as a decimal.

Match It

Which of these go together:

$3 \div 4$

0.25

$\frac{3}{4}$

$\frac{1}{4}$

0.75

$1 \div 2$

$1 \div 4$

0.5

$\frac{1}{2}$
