Answer Sheet

> Remember, (M) is written next to those questions you should have tried to solve mentally first. (W) means a written method is usually more efficient for this question.

1. $\frac{2}{5}$ of 60 = **24** (M)

2. 32,764 − 21,863 = **10,901** (W)

3. 56 ÷ 10 = **5.6** (M)

4. 80 − 28 = **52** (M)

5. 518 ÷ 6 = **86 r 2** *or* **86 $\frac{2}{6}$** *or* **86.33**
