

1) Accept a correct explanation that shows that the statement is correct, for example 1095 days is equal to 3 years whereas 37 months equals 3 years and I month. Therefore, Henry is older.
2) Accept a correct explanation which shows that Noah is incorrect, for example $13 / 4$ hours is equal
 to 105 minutes, not 145 minutes. The correct total is 388 minutes or 6 hours and 28 minutes.
3) 

a)

| Poppy | $£ 4.50$ |
| :---: | :---: |
| Liam | $£ 6$ |
| Lan | $£ 5$ |

b) $£ 69.75$
