

Please work through the questions using the method they are asking you to.

Count the number of ninths to work  $3 \times \frac{2}{9}$

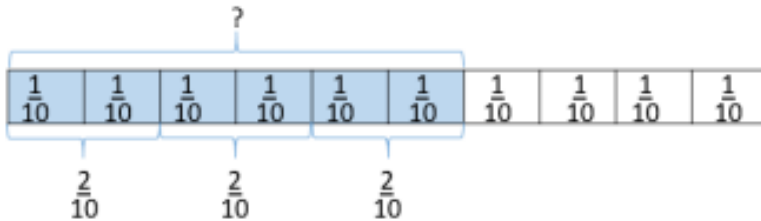

Use this method to work out:

$$\frac{3}{8} \times 2$$

$$\frac{5}{16} \times 3$$

$$4 \times \frac{2}{11}$$

Use the model to help you solve  $3 \times \frac{2}{10}$

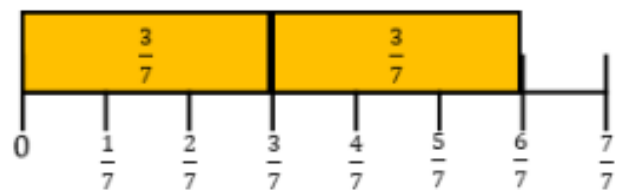

Use this method to work out:

$$\frac{2}{7} \times 3$$

$$\frac{3}{16} \times 4$$

$$4 \times \frac{5}{12}$$

Use the number line to help you solve  $2 \times \frac{3}{7}$

Use this method to work out:

$$\frac{3}{10} \times 3$$

$$\frac{2}{7} \times 2$$

$$4 \times \frac{3}{20}$$

Extension: Simplify your answer. Use the instructions on yesterday's work to find out how.
