$$\frac{1}{5} + \frac{2}{5} = \frac{\square}{5}$$

$$\frac{2}{7} + \frac{3}{7} + \frac{1}{7} = \frac{\square}{\square}$$

$$\frac{7}{10} + \frac{\square}{\square} = \frac{9}{10}$$

Isla eats $\frac{5}{12}$ of the pizza and Lily eats $\frac{1}{12}$ of the pizza.
What fraction of the pizza do they eat altogether?

Find the missing fractions:

$$\frac{7}{7} - \frac{3}{7} = \frac{2}{7} + \frac{\square}{7}$$

$$\frac{\square}{9} - \frac{5}{9} = \frac{4}{9} - \frac{2}{9}$$

Nicola and Nisha are solving:

$$\frac{4}{7} + \frac{2}{7}$$

Nicola says,

The answer is $\frac{6}{7}$

Nisha says,

The answer is $\frac{6}{14}$

Who do you agree with?
Explain why.
