

Q1

Write the temperatures in order on the thermometer, from the highest temperature at the top to the lowest temperature at the bottom

3°C      -14°C      12°C      -7°C

---

1 mark

Q2

Maryam picks any two cards and adds them together.

She can make three different totals using these cards.

560

630

750

What are the three totals she can make?

1,190

or

1,310

or

1,380

---

2 marks

Q3

Two of these numbers multiply together to make 2700.

90

20

50

30

10

Write the multiplication as a number sentence.

$$90 \times 30 = 2700$$

---

1 mark

	Requirement	Mark	Additional guidance
Q1	In order from top to bottom: $12^{\circ}\text{C}$ , $3^{\circ}\text{C}$ , $-7^{\circ}\text{C}$ , $-14^{\circ}\text{C}$	1	
Q2	$560 + 630 = 1,190$ $560 + 750 = 1,310$ $630 + 750 = 1,380$ Award <b>ONE</b> mark for two correct totals.	2	Accept totals in any order and also totals given without the number sentences.
Q3	$90 \times 30 = 2700$	1
