

Print and cut out the water cycle key words and images. On each table place the jumbled up cards. The pupils need to match the picture to the word.

Run off

Evaporation

Condensation

Precipitation

Circle either true or false for each question.

1. When heat from the sun heats up the sea, it turns the water into vapour.

True or false

2. Condensation creates rain.

True or false

3. The wind blows the clouds over land and the clouds drop their water as rain, sleet or snow.

True or false

4. Evaporation creates water vapour.

True or false

5. Run off is the excess water that runs back into rivers and lakes.

True or false
