

Each number on the clock represents 5 minutes. So we can count round in 5 s .

On a 24 hour clock, once we get past 1 pm we add 12 hours on to the time shown on the clock face.

## 24 Hour Digital Clocks

24 hour digital clocks also have an hour and minute display, separated by a colon.
The hours will always be before the colon. The hours go from 0 to 23 . The minutes will always be after the colon.

## Converting From 12 to 24 Hour oo Clocks

Do the clocks show the same time?

What is the same about the clocks?

What is different?

## Converting From 12 to 24 Hour Clocks

What is the digital time represented by the analogue clock?
On a 24 hour clock this could be two different times, what would they be?
